

# FTONE™

## What is FTONE™?

FTONE AT100 is a coating which forms on the surface of resin and metal to protect base material from various stains and spots.

FTONE GM protects base material from stain without damaging appearance by permeating into the surface of porous base material (stone).

## Grades and Features of FTONE™

Grades	Base Material	Solvent	Features
AT-100	Resin, Metal	Solvent-based	Coating Film Type Superior in chemical resistance, solvent resistance and oil repelling performance.
GMW-605 GMW-700N	Stone Material Concrete (Porous Material)	Water-based	Permeation Type Add protection/antifouling capabilities without changing appearance.
