

## MPA FA-600

---

### Characteristics

---

Daikin PTFE MPA FA-600 is a white powder made from polytetrafluoroethylene resin manufactured without the use of PFOA. FA-600 has been specifically designed for use as an anti-drip additive for plastic resins. FA-600 exhibits a medium degree of fibrillation during pre-blending operations and has good flow properties compared to other anti-drip additives.

---

Properties*	Units	Typical Value	Test Method
Bulk Density	g/l	500	ASTMD4895
Std Specific Gravity	----	2.17	ASTMD4895
Particle Size	microns	500	ASTMD4895
Melting Point	°C	328	ASTMD4895
Appearance	--	White Powder	Visual

\*Typical properties are not suitable for specification purposes.

### Safety & Handling

Daikin MPA FA-600 should be handled like other Daikin PTFE resins. When PTFE resins are heated to temperatures above 260°C, minor amounts of decomposition products are given off. These decomposition products may be harmful and inhalation of these fumes must be avoided. Ovens, process equipment and the working area must be adequately ventilated. For further information please refer to the safety data sheet for this product.
