

UNIDYNE™ TG-2211

Repellent and soil resistant finish for carpeting

Characteristics

Imparts good soil resistance to carpets with the addition of strong water and oil repellency.

Can be used in conjunction with anionic stain blocking chemistry.

Offers good foamability when applied alone or with stain blockers.

Methods of application include spray and foam.

Properties*	Value
Appearance	Off white emulsion
Ionic character	Anionic
pH	2.0 - 6.0 @ 25°C
Specific gravity	1.05 - 1.25 @ 25°C
Solids content	28.0 - 31.0%
Solubility	Readily disperses in cold water
Flash Point	Exceeds initial boiling point
Shipping & Storage	Keep from freezing

*Typical properties are not suitable for specification purposes.

TG-2211 should be stored at temperatures between -5°C and 30°C (23°F and 86°F).

Application Guide

Spray and Foam Application

Fabric Type	WPU %	F ppm	Bath Conc.	Dry/Cure Conditions
PET	15%	250	1.67%	120 ⁰ C (250 ⁰ F) final carpet temperature
PP	20%	250	1.25%	
Nylon	20%	450	2.25%
